

MSI Core Measures

- Automate medical language processing to abstract.
- Patent pending dynamic reference to linked documents.
- Reduce abstraction labor and accelerate response time.

MSI Core Measure

- Natural Language Processing (NLP)
 - Language Base Indicators
 - Consolidates Abstraction
 - Automates Collection
- Medical Documentation
 - H&P
 - Consult
 - Discharge Summary
 - Etc.
- Applied Intelligence
 - Geographic (Regional, Local)
 - Facility
 - Department
 - Physician

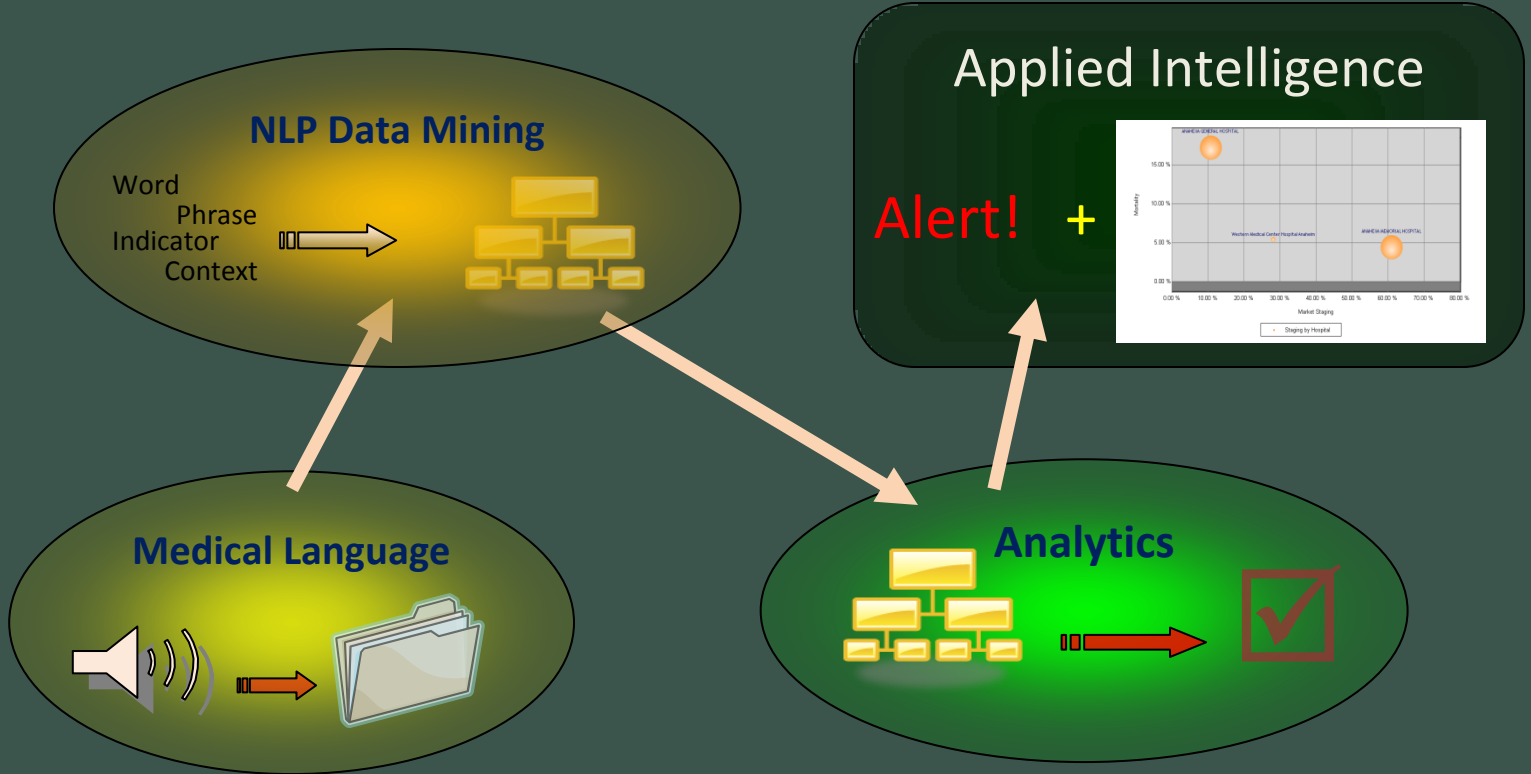

Automates collection of medical documents linked to core measure abstraction. Highlights document relevance and improvement opportunities. MSI Core Measure helps shorten the distance between medical language capture and strategic decision making by delivering applied intelligence on demand or on alert.

MSI Core Measure Work Flow

MSI Core Measure is powered by combining our Scoring Helix technology with the BizExplorer® System, a patent pending Enterprise Application, Content and Information Management System:

- Applied intelligence sourcing through Scoring Helix technologies.
- Rapid processing of documents and meta-data capture and reporting.
- Complete security of all information in the BizExplorer® System (HIPAA).
- Complete data mining capabilities on all information in the BizExplorer® System.
- Dynamically orients data views by User.
- Patent pending application sets allow for rapid deployment of user requirement changes, resulting in faster response to user need for getting timely information from their data.
- Complete accessibility to documents and related data mining operations the moment the data has been loaded into the BizExplorer® System.
